Research & Development Employee

Entry

Professional

Location

Arnsberg

Professional Field

Engineering

With the Interprint Group's foil collection, we would like to meet the wishes of many customers to also offer decors as lacquered pre-impregnation.

A new challenge in a medium-sized industrial concern with a pleasant working atmosphere is just what you are looking for? You are interested in a position where you can further develop our product. If so, then this position could be just right for you for our Finish Foil product area at our Arnsberg location.

Your responsibilities

- Close collaboration with raw material suppliers to develop new product features and qualities
- Planning, organisation, documentation and evaluation of development projects
- Implementation of all project phases
- Support of product changes as well as transition of development results into production
- Identification of suitable suppliers for special products

Your Profile

- Completed training as a paint laboratory assistant or chemical laboratory assistant
- Further training to become a paint technician is an advantage
- Experience in the application of film lacquers, wood lacquers, printing inks or related product groups
- Structured and analytical approach
- Solution- and customer-oriented approach
- Good knowledge of English
- Intercultural skills
- Willingness for occasional business trips

We offer

You an interesting and expandable field of work in an internationally active company with flat hierarchies. Intensive training is a matter of course for us. Flexible working hours and the opportunity for further development are part of a good working day for us.

Are you interested?

We look forward to receiving your complete and informative online application.
